PROJECTS

Product: **Freight Auditing and processing software / Pandocorp Pvt. Ltd.**

ABOUT: Processing the invoices using the OCR technology, auditing the invoice values using Machine learning, Automating the invoice processing using artificial Intelligence

Roles and Responsibilities:

- Evaluated and finalized the OCR scanning technologies
- Gathered current customer workflows and vendor invoice formats for processing and training to the system
- Designed the system architecture for the logic and computation of outputs according to customer requirements
- Demo to the client and support until user acceptance testing
- Developed custom reports and dashboards to increase adoption
- Analysing and improvising the usage of the product by tracking user activity
- Automated freight provisioning to General Ledgers based on different parameters

Product: **Invoicing software/ Pandocorp Pvt. Ltd.**

ABOUT: Product is enabling to automatically generate the invoices for every shipment and allow the carriers to check, verify and raise invoices at the click of a button

Roles and Responsibilities:

- Led the development of feature to compare the vendor generated invoices with system stored rate contracts
- Led the development for precalculation of budget estimations before actual shipment in order to ensure accurate purchase order value forecasting
- Implemented automation of approval of the clean invoices
- Designed and implemented reports and dashboards for real-time visibility
- Conducting market analysis to improve the product and strategise future product expansion for 8 features
- Created solutions after analyzing user feedback, solving 94% of user complaints

Product Feature: **Fuel rate peg calculator / Pandocorp Pvt. Ltd.**

ABOUT: With increase in the diesel/cng rates, the shipment freight gets impacted. Evaluating and updating the price of the contract is needed in real-time

Roles and Responsibilities:

- Solutioned automatic run of scripts on the configured dates to fetch the fuel rates and update against the threshold set in the system
- Led the development of the feature, calculation logic and automatic updation in the system
- Developed the custom reports for the feature
